PROFILE SUMMARY

Electronics and Communication Engineering graduate with a minor in Machine Learning, deeply interested in signal processing and communication systems. Skilled in Python programming, web development, and graphic design, with a strong foundation in both technical and creative domains. Enthusiastic about learning new technologies and actively sharing knowledge—demonstrated through active involvement in college communities and peer learning initiatives. Motivated to contribute to innovative projects that lie at the intersection of technology and communication.

ACADEMIC QUALIFICATION

COURSE	YEAR OF COMPLETION	INSTITUTE	AGGREGATE
B.tech in Electronics and Communication	2025	NSS College of Engineering, Palakkad	9.18 out of 10(CGPA)
Class 12th	2021	Kerala state board	99.4%
Class 10th	2019	CBSE	95.2%

INTERNSHIPS

Indian Institute of Technology, Palakkad

Project Intern

June 2024 - July 2024

Gained hands-on experience with the OpenPiton framework to explore the design and implementation of multicore RISC-V processors on FPGA. Worked on configuring and synthesizing multicore architectures, deploying them on FPGA hardware, and understanding the integration of scalable SoC components. Developed a strong foundation in computer architecture, parallel processing, and practical FPGA-based processor deployment.

Airport Authority Of India, Kempegowda International Airport, Bengaluru

February 2024 - March 2024

Gained exposure to a diverse array of fields within the airport infrastructure. From surveillance to automation and navigation aids, delved into the intricate workings of these technologies. Learned more on RADAR and also on Air Traffic Management(ATM). This hands-on experience not only deepened my understanding of electronics but also showcased the practical applications of these concepts in real-world industrial settings.

Southern Railway

08/05/2023 - 12/05/2023

Learned about traction systems, substations, SCADA, electrical systems. Expanded knowledge based on railway infrastructure. Familiarized myself with the diverse electrical systems utilized within railways, including signaling, communication, and power distribution systems.

TinkerHub Foundation

Learning Initiative Intern

June 2022 - January 2023

Conducted 4 study jams, managing students and mentors. The Study jams were based on Blockchain, Game Development, Rust and React. More than 50 students were engaged for each jams.

Gtech Mulearn Foundation

UX Designer

November 2023 - present

As a UX designer intern, specialized in creating wireframes, shaping Information Architecture, and gathering user feedback.

CORE COMPETENCIES

- Python
- Verilog
- Proteus
- LTSpice
- Web designing - HTML, CSS, JavaScript and Bootstrap
- Graphic Designing - Figma and Photoshop

POSITION OF RESPONSIBILITY

- **Gtech Mulearn** - Campus Lead
Coordinating and managing learning events on the campus.
- **Gtech Mulearn** - Web Development Mentor
Mentored students in the field of web development by clearing their doubts and assigning tasks to them.
- **TinkerHub and IEDC NSSCE** - Designer
Designed various posters for learning events conducted by TinkerHub and IEDC NSSCE. Participated in Kerala's Largest Women only Hackathon by TinkerHub.

- **HultPrize NSSCE** - Events Lead
Curated events that bring out entrepreneurial skills within the students.
- **ISTE NSSCE** - Poster Designer

PROJECTS

- **FPGA-based Implementation of a Multicore RISC-V Processor using OpenPiton**
 - Implemented a multicore RISC-V processor on FPGA using OpenPiton; deployed on ZedBoard with Xilinx Vivado.
 - Integrated Preesm-generated parallel C code and benchmarked performance using a Sobel filter image processing workload.
 - Analyzed scalability and performance across 1-core, 4-core, and 9-core configurations to evaluate multicore efficiency.
- **Smart Bus System**
 - Conductorless bus system using RFID cards for fare deduction and real-time passenger counting.
 - Bus stop time is dynamically calculated and displayed based on the number of passengers disembarking.
 - Information displayed to both driver and passengers, enhancing efficiency and convenience.
- **Spam Link Detector**
Developed a spam link detector as a part of Kerala's first women only hackathon. The spam link detector can detect any link and give an alert message if it's a spam.
- **EMI Calculator**
A basic EMI calculator that I made during my course of learning web development.
- **Car Parking Counter**
Developed the simulation for a Car parking Counter using Logic Gates only.

ACHIEVEMENTS

- **GATE 2024 Qualifier**
- **NPTEL Certification** -Programming, Data Structures and Algorithms using Python
- **NPTEL Certification** - Essential Mathematics for Machine Learning
- **NPTEL Certification** - Deep Learning

INTERESTS

- Pencil Drawing
- Driving
- Photography
